TRACKING MAGNETIC SYSTEM

# WALKER SYSTEM

Tracking Magnetic System

**WALKER SYSTEM : TRACKING MAGNETIC SYSTEM** which integrates with architecture, demonstrating that form and functionality of lighting have definitely gone down a new path, opening new ways to integrate 'lighting paths' with architecture.

It gives walls and ceilings a 'paper-thin' appearance, with no visible wires and no shadow gaps, upgrading the level of architectural detail. It offers not only new ways to give shape to any lighting need, it also gives the possibility to integrate other engineering and technological necessities.
